

30 May 2017, Douarnenez

Subject : Le Guellec has recently acquired Procintre and offers new skills in bending and shaped tubes.

Dear Sir or Madam

Le Guellec Tubes and Profiles has been a market leader in the manufacture of precision metal tubes and profiles for over 70 years for small, medium and large tubes.

LE GUELLEC's teams continue to take the utmost care to look after customers and continually seeks to expand production capacity.

With this in mind, LE GUELLEC has acquired, from Pascale and Marc Lagarde, the PROCINTRE company, specialists in precision tube bending (2D and 3D bending, streamers...) and shaped end (welding, brazing, crimping, machining, cold shaping).

Procintre employees and machinery became part of LE GUELLEC in mid-May, continuing production and development at the site located in Douarnenez , Brittany.

We will contact you in the near future, in order to outline the new developments and capabilities that this exciting acquisition brings to LE GUELLEC.

In the meantime, we invite you to have a look at our new bending and tubes shaped skills on our website: www.procintre.fr

We look forward to hearing from you soon

Yours faithfully

François Körner
President
